Department

Please enter the name of the department where your academic position is/will be located.

Position

Assistant Professor

Applicant Expertise and Experience

Career Timeline

Academic Appointment

Yes

Date of First Appointment

07/01/2017

Date of PhD Completion

07/01/2016

Have you experienced any career interruptions?

No

Award Eligibility

72

Prior Career Interruptions

Prior Career Interruptions

If you had any career interruptions prior to the completion of your PhD degree or first academic appointment (whichever is later), please provide the dates and describe the nature of the interruptions here. Examples of eligible career interruptions are parental leave, medical leave, residency training, etc.

These career interruptions will not be included in the award eligibility calculation, but will be used during the evaluation of your application.

Program of Research

Project Information

Project Title

Please enter the title of your Program of Research.

Lay Summary

Please provide a brief plain-language summary of your program of research including the problem the research will address, an overview of the research itself, and the anticipated outcomes and potential impact on understanding, care provision, and the BC health system.

The summary must be written in a way that a non-specialist and non-scientific audience can understand. It is an integral part of your funding application, and if successful will be posted to the Health Research BC website and used to share information about the valuable research supported by public funds.

For guidance on writing plain language summaries, you may find these resources helpful:
Health Research BC KT Encounters blog post from health literacy researcher Iva Cheung ([click here](#))
BC SUPPORT Unit plain language guide ([click here](#))
MS Society of Canada guide for writing lay summaries ([click here](#))

Scientific Summary

The summary should provide an abstract that is understandable by a multi-disciplinary group of scientific reviewers. Summarize the objectives and their relevance to the work proposed in the program of research providing the reviewers with the central key question being studied and related research activities. The Scientific Summary may be used to identify appropriate peer reviewers for your application.
