

Five reasons to use REDCap for data management

Easy

Any health organization can customize, collect, manage and report on data.

Web-based – no software needed.

Secure

Meets BC's privacy and regulatory requirements. Validated for use in clinical trials, meets Health Canada requirements. All data is stored in BC.

Collaborate

Can work across organizations and is supported by a strong expert community of practice.

Flexible

Includes tools to support a range of projects: health research studies, clinical trials, learning health systems projects and improvement initiatives.

No fee

Available at no charge for qualifying projects.
